

[360Cities](#) presents the largest panoramic photo of Prague

Unique 33.8-gigapixel image consists of 2,600 separate photographs

Prague, 19 June 2013 - 360Cities, a Czech company operating the largest online collection of stunning geo-located panoramic photos, has released a breathtaking 360° panorama of Prague. The photograph is made up of 2,600 separate photographs taken from Prague's Petrin Hill lookout tower. With a total resolution of 33.8 gigapixels, it is the largest ever photo of the Czech capital Prague ever taken.

The actual image size is 260,000 pixels x 130,000 pixels, and its creator is 360Cities founder Jeffrey Martin. This is the latest addition to a unique series of giant panoramic city portraits, continuing on from last year's record-breaking 320-gigapixel panorama shot from the top of London's famous BT Tower.

Martin's previous projects include a 40-gigapixel panorama of Prague's Strahov Monastery Philosophical Library in 2011, which is the largest interior photo in the world, and 2009's groundbreaking 18-gigapixel photo taken in Prague in 2009 from the Zizkov TV tower.

"This time we chose the Petrin Tower, which offers a more unique and romantic view of the city than the Zizkov tower. You feel like you're part of the picture - you can almost touch the Charles Bridge and the National Theatre," says Martin.

Canon 1D-X cameras (top of the range Canon SLRs) were used to create this unique photo along with Canon 28-300mm L and 8-15mm fisheye lenses. Clauss Rodeon robotic tripod heads controlled the cameras, and the individual photos were assembled on a powerful Celsius R920 workstation provided by Fujitsu Technology Solutions Europe.

The panorama is protected by a Creative Commons license, which allows anyone to download and use the image for non-commercial purposes.

360Cities is the world's largest community of panoramic photographers. The company recently released a 320-gigapixel panorama of London that is presently the world's largest stitched panoramic photo. In the second half of March 2013, the company unveiled its iPad app, "[360Cities Panorama](#)", which has so far been downloaded by half a million users around the world.

About 360Cities

360Cities.net is the web's largest collection of stunning, geo-referenced panoramic photos, created by a network of thousands of expert panorama photographers from around the world. Through partnerships with Google Earth, Microsoft, Nokia Maps, and Flipboard, 360Cities.net content is introduced to a worldwide audience.

360Cities offers commercial licensing of its vast library of high quality 360 content to leading digital publishers, including The Sunday Times Online, Daily Mail, Die Welt and McGraw-Hill, as well as leading advertising agencies, mobile app and game developers, and film and video producers.

360 Cities Holding B.V. is a Netherlands company with a subsidiary in Prague, the Czech Republic.
